

**Linking interactions between  
cultural and biological  
diversity on the Pacific Coast  
of North America in the face  
of climate change**  
Victoria Wyllie de Echeverria

**TUESDAY,  
SEPT. 16th, 2014  
12-1 pm @ Sealaska**

**FREE** & open to the public

Join us for a lecture by Victoria Wyllie de Echeverria, a Ph.D. candidate at the University of Oxford who will discuss how climate change is being perceived by indigenous people and how these changes are affecting cultural and biological diversity in the coastal environment of northwestern North America. Wyllie de Echeverria is doing her research in part as a visiting scholar at SHI. She received a B.Sc. and an M.Sc. at the University of Victoria, Canada, in plant ecology and taxonomy and ethnobotany, before moving to the University of Oxford to complete a Ph.D.
